

Homework Year 2

4th February 2022

In school we have continued to think about living things and their habitats. This week we would like the children to look at the 20 animals and see if they can decide which of the 5 different habitats they live in (polar, grassland, ocean, desert or forest). For each animal colour in one block of the block graph to discover which habitats are the most and least popular. You could then have a go at answering the questions to help the children think more deeply about living things and their habitats.

Have a lovely weekend
