Tuesday 23rd February

Reading

Can you complete a lesson on Reading Plus? We will be checking online to see who is completing their lessons and earning combos! Any certificates that are earnt will be saved and awarded when we return to school.

Maths

Yesterday we started looking at units of measurement and the way to change (convert) one into another, focusing on mm to cm, cm to m and vice versa. Today we are going to concentrate on km. Watch the short video clip below and remember to have a look at my supporting slide. Then have a go at the question sheets. I have put two sets on for today. If you complete the first set quickly move onto the second set.

Literacy

Using the rules from yesterday, can you convert the texts into direct speech?

Remember to:

-use " and " around what is being said

- use a reporting clause to tell us who is speaking and how they are saying it

-use a capital letter to start any speech

- use a new line for a new speaker

PE

Look at the slide on the link below (ignore that it says Wednesday). Try to carry out the suggested balances.

Project

Read through the PowerPoint, then look at the page of the atlas showing the hill ranges in the UK. Using this page can you name the areas of hills highlighted on the second map? There is a grid for you to fill in.
